### And What Have You

By BOB CRAIG

Barbara and I returned Sunday evening from a 2700-mile swing through 11 states, including Texas, and everywhere we went the people kept telling us that it was the hottest summer they had had in years. And it was not too hard to believe them.

We left here a week ago Friday and traveled Interstate 20 to the Alabama line and it seemed hot and dry all the way. We traveled as far east as Montgomery, Ala., before heading north and it was still dry.

As we turned north it seemed to get a little greener as we went but not a whole lot cooler. It was not until we got into Kentucky that the crops seemed to be real pretty and green.

But really, none of the crops seemed to be any prettier than those between Stamford and here as we were coming home.

This was the first year for Barbara and me to take a vacation without the kids and it took a little getting used to. Because it was just the two of us, we pretty much just became nomads and let each day take care of itself.

For people who spend the other 51 weeks each year worrying about deadlines, this was an ideal vacation. We rode through lots of country that we had never seen before and never really worried too much about where we would spend each night.

We spent one night with one of my sisters and one night with friends and the other nights were split between camping and staying in motels. And while the motels are convenient, you make a lot more friends in state parks and camp grounds.

We thoroughly enjoyed the week and appreciate everyone's understanding about not having a paper one week every year. But we cannot help but be envious of our friends who get four and five weeks vacation each year. That is just part of the hazard of our profession.

Rep. Bob Krueger, author of a gas decontrol bill in Congress, was a speaker at the Texas Press Association convention in Galveston recently and lashed out at the situation which is forcing Texans to subsidize energy users in the northern part of the nation.

Rep. Krueger calls this "domestic economic colonialism" and adds that it is downright unfair.

To which all Texans agree.

But how to convince the rest of the nation that this is unfair is a problem not yet solved. Those in the more populous parts of the country are using political muscle to force prices down on gas and oil ignoring the economics of producing it.

The congressman said that Texas produces 40 per cent of the nation's supply of natural gas and uses 20 per cent of it. Because the price on gas sent out of state is less than that used in the state, Texans are paying more and more, in effect subsidizing the cheaper price elsewhere.

The selling of Texas natural gas outside the state at a price below the world price is a subsidy for the rest of the country and is downright unfair. Texas asks only for equality. Texans are not asking that coal or steel be sold at a lower price here than in the states where these minerals are produced.

Half of the industries in the nation run on natural gas and practically all of the homes in Texas are heated with it.

The natural gas industry, along with the other energy industries in the state, makes up one third of the gross national product of Texas.

If the President is given the authority to allocate natural gas supplies, and if Congress passes laws imposing price controls on all oil and gas, then Texas will suffer a

# Screwworm Cases Are Reported In County

County Agent Kirby Clayton reports that screwworm egg masses were found in the Stamford area last week and many screwworm cases are beginning to spread across new areas of Texas and Arizona. Livestock producers are reminded to double their efforts in the current battle against the costly livestock pest.

Although total numbers of cases are still low when compared to previous years, the worst part of the screwworm season is still ahead and all precautions should be taken.

Texas entered June with just 22 screwworm cases reported in 10 counties during the first five months of 1977. By June 15, nine more cases were added. Although many of these cases have been confirmed in Hidalgo County, others have moved up from South Texas into the Central Texas county of San Saba and into Brewster and Terrell Counties in Big Bend-Trans-Pecos areas.

Arizona's cases had climbed to 15 by June 15, says Clayton. New Mexico had recorded four cases by that date, and California one to bring the nation's total to 29 by Mid-June.

This compares to 1,968 by the same date last year.

## FOR SENIOR CITIZENS—

# Farmers Union Green Thumb Project Coming to County

Texas Farmer's Union Green Thumb, a job opportunity for rural residents, 55 years of age or older, will begin operating August 1 in Jones county.

The purpose of the program, sponsored by Texas Farmers Union and funded through the Department of Labor, is to employ rural elderly to work in community betterment and conservation projects for non-profit organizations.

Currently, Green thumb projects operate in 36 counties throughout Texas. Green Thumbs are placed as individual workers who serve as administrative assistants to directors of Aging Programs, school lunchroom workers, Senior Citizens Center hostesses, telephone reassurance callers, librarians, museum attendants, and in numerous other social service activities.

Most counties also have a Green Thumb crew which works throughout the county in building and improvement

projects such as, repairs for public schools, weatherization of homes belonging to rural elderly, public park improvements, and other useful community projects working for both county and city governments and Senior Citizens Centers.

Green Thumb workers are paid minimum wage for a 24 hour work week. Eligible applicants receive a medical examination which is paid for by the Texas Green Thumb program. Training sessions are held periodically covering subjects of interest to the older worker such as information on nutrition and food preparation, home and work safety, consumer affairs, social activities and other areas of importance.

Green Thumb has served Texas for seven years. The program serves rural elderly of Texas whose incomes are too low to meet the normal needs and whose job opportunities are limited.

Residents of Jones County who are eligible must be 55 years of age or older, have a

# Hospital District Sells Bonds

The Hamlin Hospital District, in a called meeting Wednesday afternoon, accepted the low bid of five bids submitted on the sale of the District's \$1,000,000 bond issue.

The effective interest rate on the 25-year bonds was 5.75 percent in the low bid and ranged to a high of 6.01 percent.

Rowles, Winston Division, Cowen and Company and Cullen Center Bank and Trust submitted the low bid.

The sale of the bonds was handled by George B. Buescher and Co., Inc., Municipal Finance Consultants of Abilene.

This is the first major step in the remodeling of the local hospital following the U. S. Supreme Courts refusal to hear the lawsuit against the district. Work is presently

being completed on the final plans for the project and the contract for the construction work is expected to be let this fall.

In their regular meeting

Tuesday evening, the directors heard a proposal by DLS Contractors of Abilene to build a four-doctor clinic either for the district or for the doctors. The 5,000-foot

building would cost about \$140,000, according to the firm's estimate. This would not include sidewalks, paving, landscaping and furnishings.

**AT PLANNING CONFERENCE**—Elma Ree Crowley, center, director of the Hamlin Day Care Center, talks with Suzie Shahan, child development specialist, and Dr. Ken Bewley, program director of child development programs, Department of Public Welfare, Abilene, during the June 29 planning conference held in Hamlin at Hamlin Restaurant. The conference was attended by representatives of Title XX day care providers in a multi-county area.

## Local Day Care Center Hosts Area Conference

Hamlin Day Care Center Director Elma Ree Crowley and assistant Beverlie Pharris hosted the planning conference for day care providers of Title XX in a multi-county area at Hamlin Restaurant June 29.

Suzie Shahan, child development specialist, and Dr. Ken Bewley, program director of child development programs, both of the Department of Public Welfare, Abilene, were in charge of the sessions.

Attending were Deborah Armstrong and Mike Lewis, both of Sweetwater; Ms. Jon Shamburger of Colorado City, director of Mitchell County Community Action Program, Inc.; Bethene Wade, assistant director of Stamford Center; Sara J. Perdue, Joan M. Jones, both of Wichita Falls; Bea Ganson, Alice Rios and Anna M. Lara, all of Abilene and Vivian Dyer of Snyder.

# School Board Hires Auditor, Extends Auditorium Curtain

The Hamlin School Board hired the firm of Darrell Knight Associates, Inc. of Abilene to audit the school's finances for the past year, voted to extend the stage curtain in the new auditorium and passed a resolution authorizing the sale of the Building Trades Project house for \$27,500 during their regular monthly meeting Monday evening.

The board also adopted a new free and reduced price eligibility income scale for the school's cafeteria for the coming year. The scale is set up by state and federal regulations and must be adopted by the district.

The Abilene firm agreed to

audit the books for \$3,000 which is \$150 higher than last year.

After several months delay, the board voted to spend \$3,398 to curve the auditorium stage curtain out to cover the full stage. This will add about nine feet to the center stage area.

The board was told the district had a buyer for the house built by the Building Trades Class for \$27,500 with the district paying the closing costs. The sale is pending a loan approval.

Under the new Free Lunch Policy, a family of four with an income of up to \$7,610 will be served free lunches and the same family with an income of up to \$11,880 will be eligible for a reduced-price meal. The charge for reduced-priced meals is 20 cents.

A family of six will be eligible for free lunches if their income is less than \$9,880 and for reduced-priced lunches with an income of not more than \$15,380.

The board accepted the resignations of Mr. and Mrs. Larry Gaines and hired three teachers and two aides. Miss Debra Haney was hired as high school science teacher, Mrs. Geneva Carter as high school English teacher, and Mrs. Don Drummond as migrant teacher.

The two aides hired were Miss Alice Morales and Miss Kathryn Marshall.

In other action the board approved a \$500 contribution to the Texans for Equitable Taxation organization which is representing the district in Austin during this legislative session on a new school finance bill.

## FROM THE FILES . .

July 1 and 8, 1977

On Tuesday, Jan. 14, at 7:30 p.m. eight ladies met in the home of Mrs. W. A. Albritton for the purpose of organizing a young women's Auxiliary.

The meeting was called to order by Mrs. James Winter, who was recently elected by the Woman's Missionary Society of the First Baptist Church as Counselor for this organization and then called for nomination of officers.

The following were elected:

Miss Tennie Barnett, pres., Miss Lennie Greenway, vice-pres., Miss Faye Albritton, secretary, Miss Bencie Bowen, treasurer and Miss May Gay, pianist.

Mrs. Moore was elected Missionary Director, Mrs. Albritton parliamentarian, and Mrs. Howard Music Director.

While "prowling round" the Herald man found this week some very interesting "machinery" or equipment or something, anyway it was two very interesting electrical "outfits" in Dr. Taylor's office.

Being of an inquiring mind, we learned lots about it. One instrument is called a "diathermia" an electrical instrument of high frequency alternating current, which produces a "sedative" current which is without pain. It is for the treatment of nearly all kinds of ailments except where there is puss that cannot be drained.

Another instrument is the Ultra-Violet Ray or Sun Lamp, a very beautiful instrument that produces the ultra ray which has been proven useful as a blood builder or tissue builder, it acts somewhat on the order of a tonic.

These instruments are not new in the realm of medical treatment, but comparatively all electrical treatment is new. The Diathermia and the Ultra Violet Ray were first used most extensively in the World War and gradually as time goes on they are being placed into the small town offices.

"Dr. Taylor is to be congratulated on installing these modern 'appliances' in Hamlin.

Inzer Pharmacy has been one of the saddest and also one of the happiest business houses in Hamlin since last Saturday afternoon. It is all because of a sudden disappearance of \$287.95 from the safe last Saturday afternoon.

Tuesday morning, a package was delivered to Mr. Inzer, by Free Delivery, post marked Abilene 11:30 p.m. Sunday. It contained \$221.70 in checks and the Inzer deposit book. Therefore a spell of happiness came over the formerly very sad store. Mr. Inzer says his store really should be called a "Helpy-Selfy" store as they are so easy down there.

There are some seventeen or eighteen thousand second year vocational agriculture students in the state eligible for the top award.

## An Added Touch of Beauty

Robert Louis Stevenson said:

"The world is so full of  
a number of things,  
I'm sure we should all be  
as happy as kings."

God's world is filled with loveliness, but we need to add our own touch of beauty, so that we might be builders of a better world with Him.

Each of us was given talents which would enable us to contribute to the world and mankind something great and lasting and beneficial. May each of us use these talents to the Glory of God.

Add a touch of beauty to your life this week by attending church.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

### Greenbugs Are Reported In Area Grain Sorghum

Greenbugs are causing considerable damage to grain sorghum fields over the county according to a report this week from Jones County Extension Agent Kirby Clayton.

The Greenbug is a member of the aphid family and does damage to plants by sucking juices from the leaves and secreting a honeydew substance on the plant.

Clayton says spraying should begin before the first four bottom leaves are killed.

Economic damage may occur when damage goes beyond this point, says the agent. For further information, contact your County Extension Office.

THEN: In the '30s, '40s, and '50s ice cream in Dixie cup cartons were great favorites with youngsters—not so much for the feast as for the feature on the lids: a picture of an athlete, animal or movie, radio or TV star. Part of the fun was peeling away the cover on the picture to see who was revealed. The cards then were traded, played with or saved for premiums.

NOW: Pictures are gone from the ice cream lids, but a great many kids today think that Dixie paper cups are just tops because now they come with instructions for doing all kinds of magic tricks.

## Use your Refrigerator Wisely...

★ Open and close the refrigerator and freezer doors only when necessary. Several items can be removed at once to reduce loss of cold air.

★ Freezers and refrigerators operate most efficiently when filled to the correct capacity. Foods should be placed slightly apart on refrigerator shelves for correct circulation.

★ Cover all liquids stored in the refrigerator (especially frost-free models). Moisture is drawn into the air from uncovered liquids making the refrigerator work harder.

★ Be sure your appliance is standing level so that the door seals properly. By setting a glass of water on the top, you can see if it is level.

The remaining members of what used to be the "Jaycees" want to say "Thank You" to the Ag Club for their generous donation to the community building. ## Neinda Cemetery Worked, More Money Needed

Officials of the Neinda Cemetery Association have announced that the mounds were hoed the last week in June and the alleys have been mowed again. Those with relatives and friends buried at the cemetery are invited to drive out and see the grounds.

John R. Brown, secretary-treasurer, said that the work had been very expensive this year. Since the April reunion, he said, the cost would be near \$600.

The working account is not sufficient to have the grounds worked again, he added.

"We are asking anyone, and especially those who have not contributed this year, to please send a donation to help pay for upkeep," Brown noted. Also he asks for any information available on unidentified and unmarked graves.

Checks may be made payable to Neinda Cemetery Association and mailed to Sam Hodges, chairman, or Brown, Route 1, Hamlin.

Checks may also be deposited directly to the cemetery account at Farmers and Merchants National Bank.

# Neinda Philosopher Has A Scheme to Avoid Being Swamped With Presidential Libraries

Editor's note: The Neinda Philosopher on his Johnson grass farm on Route One thinks he has foreseen a problem for this country.

Dear editor: There's a future problem facing this country the people ought to be giving some thought to. It's Presidential libraries.

Although Gerald Ford

served only two years, plans are now underway to build a Presidential library for his papers. Ground was broken recently for a library for John Kennedy. The Harry Truman library was built several years ago. The Lyndon Johnson library was completed a few years ago and is now crammed with millions of Presidential papers and other odds and ends. There's some random talk of building one

for Richard Nixon. Stop and think about this. If every President has to have a library when he leaves office, and if this nation endures for 1,000 years, do you realize how many libraries that's going to be? One hundred and twenty-five, if we have a retiring President every eight years. Actually it'd be more than that, counting one-termers, future resignations, possible

impeachments, etc., plus the libraries already built. Ought to come to over 150 at least. That is a passel of libraries, and they're going to get crowded, especially if one city winds up furnishing say 10 or 15 Presidents. It might take a Constitutional amendment saying no two Presidents can come from the same town and still have a library.

Therefore I have an idea.

Let's head off this library crisis before it gets out of hand. The thing to do is to build one huge pyramid in about the center of the country and put all past and future Presidents' papers and stuff in it, down to the last inaugural hat, pipe, bottled ship, First Lady's dresses and secret agreements with foreign countries.

Now nobody knows for sure how the Great Pyramids

were built, but somebody in the military-industrial complex, if given a coat-plus contract, ought to be able to get the hang of it. Egypt, where they are, would be a great place for junketing Congressmen to visit to study the things. They could come back by way of Paris. If this country doesn't want to be over-run with Presidential libraries, we'd better get that U.S. pyramid
